

AWR-346 UPCOMING COURSE

Introduction to Radiological/Nuclear WMD Operations for Law Enforcement

This course provides law enforcement personnel with fundamental knowledge regarding two distinct mission spaces related to Radiological/Nuclear threats. The course addresses the Preventive Radiological Nuclear Detection (PRND) mission including program structure, operational modes and federal assets. The response mission area includes an overview of recognition of the threat or incident, protective measures, notifications and securing the incident site during Radiological/Nuclear WMD incident as they relate to law enforcement operations.

The course will be available as instructor-led training and train-the-trainer.

Course Objectives

Upon completion of this course, Participant will be able to:

- Recognize potential radiological/nuclear weapons of mass destruction (WMD) threats, domestic and foreign, and understand the consequences of a radiological/nuclear accident or terrorist incident.
- Identify basic prevention strategies at the global and local level.
- Explain the concepts of ionizing radiation, its sources, properties and units of measure.
- Describe the potential harm and biological effects caused by ionizing radiation.
- Describe the recognition indicators and suggested notification for first on scene responders during a radiological/nuclear WMD incident.
- Identify and initiate awareness level protective actions at the scene to reduce radiation exposure and/or contamination to themselves and others.

Target Audience/Discipline

Law Enforcement

Eligibility

It is the responsibility of the jurisdiction to select course participants.

Location

Participant site
